

Here's a comprehensive overview of student statistics for **San Jacinto College** (located in Pasadena, Texas):

Enrollment

- Total enrollment in 2023 was **31,494 students**, with **10,641 full-time** and **20,853 part-time** students — meaning about 33.8% are enrolled full-time.
 - The student population has **grown by 32%** over the past five years.
-

Gender

- By gender, **12,960 male** and **18,534 female** students attend, giving a male-to-female ratio of approximately 41:59.
-

Race & Ethnicity

- The student population is **63.3% Hispanic or Latino**, 15.8% White, 8.48% Black or African American, 4.99% Asian, 1.86% two or more races, with smaller percentages of American Indian/Alaska Native and Native Hawaiian/Pacific Islander students.
 - San Jacinto has been designated a **Hispanic Serving Institution (HSI)**, making it eligible for federal grants to support its efforts serving Hispanic Americans.
-

Age Distribution

- **7,145 students** are under 18 years old, and **25,315 students** are under 25. About **6,179 students** are over 25, and only **29 students** are over 65.
 - **45.02%** of students fall into the traditional college-age range (18–21), compared to the national average of 60%.
-

Online Enrollment

- **9,405 students** are enrolled exclusively in online courses, and another **10,134 students** take at least some online courses.
-

Graduation & Degrees

- The most popular Associate's Degree concentrations are **General Studies** (1,253 degrees), **General Business** (679 degrees), and **Behavioral Sciences** (350 degrees).
 - The demographic with the highest graduation rate is **female Asian students at 50%**.
-

Financial & Economic Profile

- **56% of students** can be considered low-income, as indicated by their receipt of Federal Pell Grant Aid.
 - **97% of the student body** resides in Texas, meaning very few out-of-state students attend.
-

Student-Faculty Ratio

- The student-teacher ratio is **23:1**, which matches the Texas state community college average. This ratio has improved significantly from 35:1 five years ago.
-

San Jacinto College is a large, diverse, and growing community college serving a predominantly Hispanic, majority-female student body in the greater Houston area. Would you like more detail on any specific area, such as graduation rates or program offerings?

I now have excellent 5-year trend data. Let me put this together in a clear visual format.

Here's a breakdown of the key trends over the five academic years from 2020–21 through 2024–25, based on IPEDS data:

Total enrollment has been relatively stable, ranging from a low of 30,593 (2022–23) to a high of 31,812 (2024–25). The student population has grown by 3,486 students over the past decade, with the 2024–25 enrollment standing at 31,812.

Gender has remained consistently female-dominated across all five years, holding steady at roughly a 59% female / 41% male split.

Race/ethnicity shows a notable shift: Hispanic enrollment has grown from 19,175 in 2020–21 to 20,158 in 2024–25, while White student enrollment has steadily declined from 6,235 to 4,831 over the same period. Black and Asian enrollment have remained relatively flat.

Online enrollment tells a dramatic COVID-era story: in 2020–21, 26,636 students were enrolled exclusively online — the vast majority of the student body — due to the pandemic. By 2022–23, that figure had settled to around 9,425, and it has remained near that level since, with 9,455 exclusively online students in 2024–25. The number of online students has increased 249% since 2015.

The college has remained remarkably consistent in its core demographics while navigating the post-pandemic shift back to in-person learning. Would you like a deeper look at any particular metric, such as graduation rates or tuition trends over this period?
