

Goal 1: Student Success

The recommended metrics are presented within a framework of a student's experience at the College: (a) entering, (b) continuing, (c) completing, and (d) achieving (after completion).

Entering

- *Admissions to Enrollment Efficiency* measures the percentage of applicants that reach the first day of enrollment. It represents the success of applicants that successfully begin their academic career at the College.
- *Headcount (Unduplicated)* measures the overall enrollment growth of the institution as a longstanding, strategic metric.
- *Financial Aid, Un/Met Need* measures the extent to which students are able to overcome financial barriers to beginning and to continuing their college career.
- *[See Outreach & Partnerships > Reaching All Segments]*

Continuing

- *Pathway Consistency* measures the reliability of students selecting a pathway represented by the percentage of students that maintain their selected program over time (inverse of students changing their major declaration within one year).
- *Pathway Efficiency* measures the extent to which a student stays on their chosen pathway and may be calculated as (the semester credit hours attempted/completed in the semester that applies to the pathway) divided by (total semester credits hours attempted in the semester).

- Related measures include *Success Points Complete Developmental Education*

- *Pathway Velocity* measures how quickly a student is completing their pathway and may be calculated as (semester credit hours attempted/completed in the semester that applies to the pathway) divided by (total semester credit hours required for completion).
 - Related measures include *Full-Time/Part-Time Students, Pathways' First Year Velocity, Success Points 1st College Level Math, Success Points 1st College Level Read/Write, Success Points 15 SCH, Success Points 30 SCH.*
- *Student Success* measures the extent to which students succeed in courses and may be measured by A-C Success, First Term A-C Success (or First Term GPA), aggregate Program Learning Outcomes Assessment results (including general education outcomes assessment).
- *Student Retention* measures the extent to which students complete courses and may be measured by Retention Rate and the inverse, Withdrawal Rate.
 - Related measures include reasons for student withdrawal that will need to be collected via the currently planned Withdrawal Survey; a measure of *Student Self-Efficacy* may also be beneficial.
- *Student Persistence* measures student enrollment in subsequent semesters and is measured by existing *Fall-to Fall Persistence* and *Fall-to-Spring Persistence* metrics.

Completing

- *Degrees or Certificates Awarded* is the number of awards earned by students. This metric is included in the THECB success points model.
- *Degrees or Certificates Awarded in Critical Fields* is the number of awards earned by students disaggregated by instructional programs in alignment with THECB success point model definition of critical fields.
- *Graduation Rate, FTIC Graduation Rate: 2-year, 3-year, 4-year* measures the rate at which identified cohorts graduate over designated spans of time. These are standard measures used by multiple organizations, including IPEDS, THECB, and others.
- *Average Time (Years) to Completion* measures the average student time for completion of an associate degree (defined by THECB).

- *Semester Credit Hours to Degree* is calculated as the average number of attempted semester credit hours students complete to earn an associate degree.
 - Related measures may include *Average College Prep SCH Completed*, *Average College Level SCH Completed*.
- *Student Loan Default Rate* represents the loan default rate as defined by state and federal regulations.
- *Average Student Debt* represents the average student loan debt accrued by students.
 - Related measures may include *Average OER-based Cost Reduction per Student*

Achieving (after completion)

- *Transfer Rate* is the percentage of students earning an academic transfer degree (AA, AAT, or AS) that transfer to a university.
 - Related measures may include *Success Points Transfer with 15 SCH*.
- *Transferability* represents the success with which graduates transfer to universities with a focus on the percentage of their SJC courses that transferred (THECB report: CBM00T)
- *Completion After Transfer* is the percentage of students earning an academic transfer degree that earn a bachelor's degree after transferring to a university.

- *Employment Rate (Job Placement)* is the percentage of students completing a workforce credential that achieve employment, and preferably, employment in their field of study (e.g., THECB report CBM116 and other sources).
- *Earnings after Completion* is an estimate of earnings achieved by graduates after completion.
- *Licensure/Certification Rate* represents the percentage of students completing a pathway with licensure/certification that successfully earned the aligned licensure/certification.

Comprehensive

- *Favorable Outcomes* includes all credential-seeking students who either persisted from one semester to the next, graduated, or transferred.
